

Alessandra Riul

HOSPITALITY SPECIALIST · PROCESS & PERFORMANCE STRATEGY · BUSINESS OPERATIONS & ESG INTEGRATION

lezitariul@gmail.com · linkedin.com/in/alessandrariul · EU Citizen (Italian)

Portfolio: https://alessandrariul.github.io/Business_Portfolio/

Business operations leader with 15+ years of international experience directing complex hospitality and service operations across five countries. Expertise in Business Process Management, organizational structuring, financial governance, and performance optimization — building scalable systems and aligning teams around measurable objectives. Rather than offering generic advice, I develop practical solutions that improve visibility, strengthen decision-making, and continue delivering value long after implementation. Seeking senior operational leadership roles to contribute at a strategic level.

Support continuous improvement

SELECTED PROJECTS

Menu Engineering & Procurement Overhaul

Food & Beverage · Single-outlet operation, 40+ staff

Rebuilt recipe costing, pricing and procurement from the ground up for a high-end, logistically remote F&B operation with no prior margin visibility.

Result: Food & beverage costs reduced an estimated 12–15% within two quarters; reporting discrepancies largely eliminated.

Multi-Property Operational Turnaround

Hospitality · Multi-unit resort, 10 departments, 100 staff

Audited and restructured every department of a 15-hour, 7-day operation — SOPs, procurement, cross-training — while sustaining day-to-day service.

Result: Cost control improved an estimated 25% by month six; engagement extended into a second year.

Boutique Hotel & Restaurant Opening

Hospitality · New-build property, remote location

Managed construction through launch — licensing, nationwide recruitment, and a custom POS/procurement/accounting integration — on a fixed opening deadline.

Result: Opened on schedule with fully integrated reporting from day one; led to an offer to continue for a second year.

WHY WORK WITH ME

- ◆ **International Perspective** — adapts quickly across business cultures, building solutions people adopt.
- ◆ **Practical Thinking** — the best systems are the ones teams keep using after I leave.
- ◆ **Sustainable Results** — every project leaves behind tools that keep creating value.
